DETAILED ACTION

Response to Amendment

1. This action is in response to the CPA filed 16 April 2001 that amended claims 1, 7-9, 13-15, 23, and 24.

Response to Arguments

2. Applicant's arguments with respect to claims 1-18 and 22-29 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. Claims 1-18 and 22-29 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. There is no discussion in the specification of the compression of image frames producing control information indicative of buffer behavior. Firstly, there is no teaching of the potential for a causal relationship between the production of the control information and compressing the frames. Secondly, "indicative" does not define any real relationship between the control information and the buffer behavior. Finally, "buffer behavior" is not defined in the specification and is somewhat confusing on its face. Buffers are inanimate objects, and hence, "behavior" is not the best word to describe the processes that the buffer performs, if this is in fact

what "behavior" refers to. "Operation" would probably be a better word. The examiner would appreciate applicant noting specific examples within the specification of these operations.

In view of these problems, an analysis of the claims with respect to the prior art was not done.

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claims 23 and 25-29 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

7. Claim 23 recites the limitation "said buffer behavior" in the last line of the claim. There is insufficient antecedent basis for this limitation in the claim.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Douglas J. Meislahn whose telephone number is (703) 305-1338. The examiner can normally be reached between 9 AM and 6 PM, from Monday through Thursday.
